

SAP Licenses Optimization – Proof of Concept

What is SIVIS License Manager?

The SIVIS License Manager is an add-on for optimizing SAP licenses.

Optimizing the SAP License portfolio with the License Manager guarantees a permanent, ideal distribution of the available License inventory based on actual usage of SAP users. The tool collects reliable data on the usage behavior of the user, analyzes and evaluates them using a transaction database with the optimal license type. The result is a permanently optimized SAP landscape. This frees up licenses, avoids unnecessary new purchases and uses unused licenses elsewhere.

SAP licensing becomes secure, transparent and verifiable.

Why should you use SIVIS License Manager?

- Targeted purchase of the optimal license types in exact quantity
- Avoiding costly over- or under-licensing
- Transparent licensing based on usage
- Complete SAP Software License Compliance
- Identification of indirect usage

1 PoC SAP Licenses optimization

1.1 What are you getting

With SIVIS License Manager you will be able to see your SAP Licenses optimization potential, making the decision to go for the complete Solution based on cost savings estimations.

Following deliverables will be available:

- The number of unused licenses
- A license count based on actual usage (create, change, display) and the top 50 custom transactions
- Simulation for additional license types
- Engine consumption count

SAP User types Report:

User types									
ID	Contractual User Type	Inventory	Price	Rank	Users old	Price old	Users now	Price now	Price diff
	(none)	0	3.500		67	234.500	0	0	-234.500
71	Sondertyp Dokumentenb.	50	80		50	4.000	0	0	4.000
72	Sondertyp Appbetreuer	50	50		20	1.000	0	0	1.000
CB	SAP Application Professional	1.200	3.500		1.383	4.840.500	1.156	4.046.000	-794.500
CA	SAP Application Developer	14	6.000		22	132.000	9	54.000	-78.000
CC	SAP Application Limited Pro	600	1.500		651	976.500	521	781.500	-195.000
CD	SAP Application Employee	2.200	400		2.350	940.000	2.650	1.060.000	120.000
CE	SAP Application ESS User	600	125		800	100.000	610	76.250	-23.750
		4.714			5.343	7.228.500	4.946	6.017.750	-1.210.750
g.	Grouped users (no cost)	0	0		0	0	0	0	0

Before optimization: “Users old” based on Inventory

After optimization: “Users now” based on actual usage

1.2 Step by step

You will be assisted from one of our SAP License Management expert in all the steps of the PoC.

- You will receive our *Installation Guide*
- First installation with help our Expert
- Configuration assisted by our Expert
- SAP Licenses optimization reports are available

1.3 Conditions

The PoC main conditions are:

- 4 weeks test limitation
- Based on 3 SAP systems
- SAP Usernames are not shown and results cannot be written back
- Indirect usage analysis not included

1.4 Pricing

You can get your SAP Licenses optimization PoC for a fix price of **3.500€**
